

Custom Shape Program

Want to be able to cut your school's mascot on your Cutout Maker? How about a logo your student designed in class? With our Custom Shape Program, personalize your walls and bulletin boards with shapes that are tailored to your school.

Custom Shape Creation

CUSTOM SHAPE PRICING	CATALOG #	PRICE
Simple Custom Shape	CS001	\$175.00
Complex Custom Shape	CS003	\$275.00
Additional Design Styles	CS004	QUOTE

Have something more specific in mind than just a basic shape? For an additional fee, we can add a version of your Custom Shape designed in any of these 3 design styles:

Separate Cut Shapes

With this option you can choose to have your image broken into two separate regular cut shapes (for example: Mascot + School Name), appearing in the "Shapes" section of the Design Center Software with different Search IDs.

Vinyl Only Cut Shape

This cut shape is designed specifically to be cut on VariQuest Vinyl Material. This shape will more accurately reflect the original design as less modifications need to be made for conversion to a vinyl cut shape (ie letters will not need to connect)

Layered Cut Shape

Recommended for use with VariQuest Vinyl Material, this option provides you with a layered shape for multi-colored cut shapes. This shape will appear in the "Collections" section of the VariQuest Design Center Software.

The cost of the shape is contingent on its complexity. Please note that very simple shapes will have a low price point while complex shapes will have a high price point.

Additional shape design style fees are quoted in addition to the base Custom Shape price. Our designer will provide a quote for the additional styles prior to the start of the design process.

We cannot guarantee that all submitted shapes can be made into a cut file - but we'll do our best!

When ready to have your logo quoted for a cutout shape, please go to:
